Additionally, there are more than 90 independent sellers moving lift truck materials and materials handling equipment. This network helps Doosan Infracore America to aggressively compete in this competitive marketplace. The forklift product line remarkably comprises of 63 distinctive models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous truck models range from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift and lift truck corporation in the North American market, thanks to its excellent level of product performance and their consistently high level of client support and service given to all Doosan Infracore Forklift users. The U.S. forklift division located in Cleveland has a skilled team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Originally the home-based forklift marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled forklifts as part of a home-based machinery expansion project. Product sales of these products were initially targeted to state-run companies, large scale businesses, and the armed forces. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for enhancing quality and product development.

Daewoo started the first domestic lift truck business in 1967, and quickly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological improvements combined with sales success placed them in a position of considerable growth of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the highly competitive North American materials handling market. This project proved highly profitable for Daewoo and their forklift product sales expanded greatly. In 1984, the company finished development of a new facility to help in producing high end value-added products for export. In 1993, the corporation had a international sales system and started exporting versions they had developed through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas markets.
