

Aerial Work Platforms

Aerial Work Platforms - There are a variety of forklift accessories existing on the market. They can help transform your lift truck so that you could expand your ability to pick objects up or accomplish clean up tasks and material handling with less effort.

Several attachments were specifically intended for the forks themselves. For example, blade extensions can be used when you need much more fork length, that increases lifting capability. Blade extensions come in lengths varying from forty eight to one hundred twenty inches. Rounded or triangular attachments are one more type used whenever transporting rolled material in order to ensure it does not roll off of the typical flat blades.

Lifting attachments can be pivoting and telescoping crane attachments. They are available in various styles. These accessories are often designed for transferring poles, lumber, metal bars or whichever type of bulky items. Other accessories like for instance other styles of hooks and hook plates are existing to be able to pick up items using a chain or sling. Slab lifters and magnetic lifters are other things which can be used along with hook accessories. Slab lifters are specialized attachments which are meant for picking up different materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which connect to your forklift to make transferring rolls of carpet a lot easier. The accessory connects onto the lift truck's blades and has a pole that goes through the middle of the carpet roll.

There are several kinds of lift truck accessory designed for facility maintenance like for instance snow forks. These industrial blades could be connected to front end loaders and used for transporting materials like dirt, and mulch as well as snow. Other popular cleanup attachments consist of standard sweepers and magnetic sweepers. Standard sweepers consist of a broom that the forklift forks connect onto for sweeping large spaces like for instance factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in areas where there is lots of metal debris such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up easy and fast.

Material spreaders are other accessories used on forklifts. These spreaders are useful for a range of applications like spreading ice melt, rock salt, pellets, seeds, fertilizers, insecticides and seed.

Another optional lifting attachment are work platforms. These could be used by lots of different companies daily. Platforms may vary in size from 36" x 36" to up to 60" x 60". A few models may be existing and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location making use of the forklift. Larger platform models have extra space for workers to carry tools and other essential things meant for the job. Usually work platforms are constructed of poly material or steel.
