

JLG Forklift Parts

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove set out on a cross country RV voyage. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

Whilst on their trip, John spent time talking to former business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a substantial market for a product that could promptly and safely elevate people in the air to accomplish upkeep and other construction services.

Following their return from vacation, John set up a business with two of his friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty personnel, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design elements of that original lift into current versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the company has extended itself into a number of global marketplaces and continues to cultivate innovative equipment to ensure that customers are able to become safer and more well-organized within their workplace.
