

Forklift Electrical Part

Forklift Electrical Parts - Lift trucks can be particularly labeled for use in dangerous locations. A labeled forklift indicates the design has met the lowest standards of ANSI/UL 558 meant for engine powered lift trucks or ANSI/UL 583 meant for electric forklifts for the type of label placed.

Applications for labeled forklifts can be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Check with your local insurance provider and Fire Marshall for further information on the approved uses of industrial powered forklifts in your application.

If the forklift has been proven to satisfy the outlined standards, the following labels may be put. A marked truck would have the type description placed on the forklift nameplate and will have one of the following labels placed.
